EXPAND YOUR TESTING CAPABILITIES

Get more flexibility from your Mastercool 53551 Automotive Tracer Gas Regulator Kit with the 53000-NGKT CGA580 US Standard Tip Fitting for Nitrogen Gas. This optional accessory allows technicians to connect the regulator to nitrogen gas supplies using the CGA580 standard, making it a valuable addition for shops that use nitrogen for pressure testing and related service procedures.

If you already rely on the 53551 for precise nitrogen-hydrogen tracer gas leak detection, adding the 53000-NGKT helps expand the kit's connection versatility—giving you more options when setting up your testing equipment.

One small accessory. More connection flexibility for your 53551 kit.
